

A hull is the smallest interval that contains the effects still possible

-0.203

0.746

0.949

$\Theta(\hat{C})$: the 3 distinct effects the class allows

blanket hull, width 1.152

retraction hull RH_1 , 18% of the blanket

RH_0 with the correct expert

RH_0 with one reversed claim: misses

zero

★ true effect

total effect of X on Y
